The RE60, Bajaj Auto's low-emission car, has high fuel-efficiency ratios.

Bajaj Auto, the country's second largest bike maker, unveiled a low-emission car on Tuesday, TV channel visuals showed, the company's first product for the car segment. The RE60 has high fuel-efficiency ratios, the company said in a promotional video.

France's Renault SA and Japan's Nissan Motor Co will decide on any future engagement with India's Bajaj Auto Ltd on the company's new four-wheeled vehicle after this weekend's auto event in New Delhi, Bajaj Managing Director Rajiv Bajaj said.

The company had been working with Nissan and Renault on a project to develop what was originally planned to be an ultra low-cost minicar.
